## Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

## THIS WEEK'S FEATURED ARTIST • CURTIS GRIMES

Born in 1986 in Gilmer, Texas, [Curtis Grimes](#) was a star athlete in high school, and as pitcher with their baseball team, he helped take his team to the state championships. A strong student as well as a star on the diamond, He was awarded a scholarship to Centenary College in Louisiana, but after splitting up with his fiancée, he set aside both baseball and academics for a while. As he sorted out his feelings, he began toying with his roommate's guitar, and soon he bought his own six-string from a pawn shop and began playing in earnest. Curtis resumed his academic career at Texas State University in San Marcos, but he brought that guitar with him. After playing for friends and relatives at gatherings and parties, he was hooked by the entertainment bug. He started playing acoustic shows at a couple of small venues, bars, and fraternity parties.

In 2011, Curtis Grimes was given the opportunity to appear on the hit reality TV show "The Voice" in 2011. Under coach CeeLo Green, Grimes ended up finishing as a Top 10 Finalist of Season 1.

Fast forward... In 2018, Grimes was named "Male Vocalist of the Year" by the Texas Country Music Association. He also received the honors of winning "Christian Country Artist of the Year" and "Christian Country Song of the Year" as well. In 2019, Grimes took home the "Entertainer of the Year" award along with the "Christian Country Song of the Year" for the second year in a row.

Now soon to be back in the top 10 again, this is his newest single ["River Road Dream"](#)
