## Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

# Dance Time In Texas with DJ Mike (08/14/20)

## THIS WEEK'S FEATURED ARTIST • CORY MORROW

[Cory Morrow](#) born and raised in Houston Texas, started playing guitar at Memorial High when he was 15 on an instrument his stepfather won in a coin toss in a Mexican border town. He continued to develop as a musician while attending Texas Tech where he became friends with another student by the name of Pat Green. Shortly thereafter they had their 1st single [TEXAS ON MY MIND](#) which went to #1 on the charts. After college, Cory packed up his Hat, Boots, and Guitar and moved to Nashville to pursue his dream of becoming a Country Artist. He tried pitching his music however Nashville didn't like his style, so Cory headed back to Texas to get back to his roots where he had his next big hit NASHVILLE BLUES. 20 years later he is now a Texas Legend as he sings about strippers and Jesus with equal fervor. From the beer soaked days of his early career, to today's more sober and spiritual leg of the journey, one thing about Morrow has never changed, "as goes Cory's life, goes Cory's songs" and that's never been more evident than on his Latest CD "Whiskey & Pride".

This fan favorite is quickly rising to the top of the charts [ALWAYS & FOREVER](#)
