TRACtion only recognizes detections on songs that have been “fingerprinted.” We do our best to obtain and fingerprint all new releases; songs serviced through CDX are encoded automatically. Go to <https://www.cdxcd.com/fingerprinting-upload-center/> for fingerprinting.

## Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

Sign up for our weekly newsletter, which includes the CDX TRACtion Texas Chart at [www.tractiontx.com](http://www.tractiontx.com).

# Dance Time In Texas with DJ Mike (02/05/21)

## THIS WEEK'S FEATURED ARTIST • ROBERT RAY

[ROBERT RAY](#) from Alice, Texas is probably more comfortable in a baseball cap than he is wearing his cowboy hat. In the summer of 2014, he attended an open tryout at Coastal Bend College in Beeville. With an 89-mph fast ball and some decent control, he easily made the team. At the same time, he started to play guitar which quickly became a new passion as well. When the baseball season ended, he formed a band and started to play around town. Once baseball season started up, he found himself at a crossroad as the Baseball games would be scheduled the same day as some of his gigs.

That's when he decided to put down the glove, hang up the cleats, and pick up the guitar where he would eventually find success with hits like [Run Away With You](#), [Good Country Song](#), and [Think About You](#) which featured Grammy award-winning guitarist Chris Perez who was husband to the late Tejano superstar SELENA.

This is his newest release on the Texas music charts [COME HOME TO YOU](#)

## TOP TEXAS RED DIRT SONGS

1. [ANOTHER TOWN • JON STORK](#)
2. [DRINKING MONEY • RANDY ROGERS BAND](#)
3. [SILVERADO SATURDAY NIGHT • AARON WATSON](#)
