TRACtion only recognizes detections on songs that have been “fingerprinted.” We do our best to obtain and fingerprint all new releases; songs serviced through CDX are encoded automatically. Go to <https://www.cdxcd.com/fingerprinting-upload-center/> for fingerprinting.

Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

Dance Time In Texas with DJ Mike (06/25/21)

THIS WEEK'S FEATURED ARTIST • CHAD COOKE BAND

Four modern-day country crooners from Houston are paving their way in the country music scene. In and out of honky-tonks across the US, the [CHAD COOKE BAND](#) delivers 3- & 4-part harmonies with a country rock-n-roll edge. Since the release of their debut album, Easy Way Home, in December of 2016, the band's first single, "Oil Man", continues to be a fan favorite with over 6 million streams and a music video that has amassed over 10 million views across social platforms! Following the viral popularity of "Oil Man", the band set off to Nashville in March of 2018 to record their next project. Their sophomore album, Risk It All, is honest Texas Country music with just enough Nashville shine to attract the attention of music industry executives. The first radio single from the album, "Whatever It Takes", climbed all the way to #3 and set the record for the longest charting single on Texas/Red Dirt Radio at 43 weeks on the chart! Building on the success of "Whatever It Takes", the following four singles ("Life Behind Bars", "Four Minutes", "Cowboy's Cowgirl", "Bringing Country Back") all reached #1 on Texas/Red Dirt Radio. Get ready as they now have another new song that might make it 5 in a row. This is their newest release (and a great music Video) [I WANNA GO OUT](#).

TOP TEXAS RED DIRT SONGS

1. [QUEEN FOR A NIGHT • CASEY DONAHEW](#)
2. [HOLD MY BEER • RANDY ROGERS & WADE BOWEN](#)
