TRACtion only recognizes detections on songs that have been “fingerprinted.” We do our best to obtain and fingerprint all new releases; songs serviced through CDX are encoded automatically. Go to <https://www.cdxcd.com/fingerprinting-upload-center/> for fingerprinting.

Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

Dance Time In Texas with DJ Mike (07/16/21)

THIS WEEK'S FEATURED ARTIST • JAMES COOK

JAMES COOK is not only a talented musician. He's the morning show host at 94.9 The Outlaw in Wichita Falls. How he finds the time to DJ early in the morning, perform at events like the Outlaws and Legends Festival, The MusicFest in Steamboat Springs, the Ranch Bash in Ft Worth, TX and still manage to have three Top 40 singles on the Texas music charts is simply amazing. His Latest Album "[The Other Side of Hell](#)" is a collection of songs he wrote based on life changes inspired by his wife. When it came time to find a female to sing on the album, James Wife said it had to be [Sarah Hobbs](#).

This is their story that turned into a top hit single.

[WE BOTH KNOW BETTER - JAMES COOK fea SARAH HOBBS](#) now airing on [STARS OVER TEXAS TV](#) the brand-new Texas Music Video Television channel available on ROKU, Amazon Fire TV, and Apple TV.

TOP TEXAS RED DIRT SONGS
