TRACtion only recognizes detections on songs that have been “fingerprinted.” We do our best to obtain and fingerprint all new releases; songs serviced through CDX are encoded automatically. Go to <https://www.cdxcd.com/fingerprinting-upload-center/> for fingerprinting.

Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

Dance Time In Texas with DJ Mike (07/30/21)

THIS WEEK'S FEATURED ARTIST • KALEB McENTIRE

Kaleb started playing piano in church at the age of 6, and as he got older, learned to play drums and guitar. Believe it or not he is related to the Outlaw Jesse James which is probably why his style leans to the Outlaw side of country music like Waylon Jennings and Tompall Glaser. After moving to a farm outside of Dallas he started playing the bars and dancehalls of Texas. This newcomer to the Texas Music scene quickly found success when his 1st single [PLAIN O' TEXAS](#) hit the top of the Charts back in January. His newest single is the story of how he grew up as part of the James Gang in the backwoods of Missouri. This is [JESSE JAMES](#).

TOP TEXAS RED DIRT SONGS

1. [BOOTS • AARON WATSON](#)
2. [ANYBODY LOVIN' YOU LATELY • CLAY HOLLIS](#)
3. [SIGNS • DAVID ADAM BYRNES](#)
