Strikethrough = Removed Bold = Newly Added Underlined = Frozen this Week Double Underlined = Frozen 2(+) Weeks

TRACtion only recognizes detections on songs that have been “fingerprinted.” We do our best to obtain and fingerprint all new releases; songs serviced through CDX are encoded automatically. Go to <https://www.cdxcd.com/fingerprinting-upload-center/> for fingerprinting.

Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

Sign up for our weekly newsletter, which includes the CDX TRACtion Texas Chart at www.tractiontx.com.

Dance Time In Texas with DJ Mike (10/07/22)

THIS WEEK'S FEATURED ARTIST • TY LARAMORE

Born and raised in Baytown, Texas [TY LARAMORE](#) grew up with a passion for Blues, Southern Rock, and Country Music. Influenced by the music of Darius Rucker, Lynyrd Skynyrd and Keith Urban, his strong vocals and smooth tone blend together for a new twist on country music that penetrates the soul. At 7 years old he began playing drums on his brother's drum set. He was given his first guitar at the age of 11 and immediately fell in love with playing it. During his high school years, he played in a band as a drummer, but inevitably his heart was drawn back to guitar when he discovered his talent for singing and entertaining friends. After graduating, Ty chose to pursue music as a full-time career. Ty debuted his first release "[Fix Your Broken Heart](#)" to Texas Radio in Feb 2022 which reached Number #29 on the Texas Charts!

This is his newest single, [DON'T CARE ABOUT IT NOW](#).

TOP TEXAS RED DIRT SONGS
