Strikethrough = Removed    Bold = Newly Added    Underlined = Frozen this Week    Double Underlined = Frozen 2(+) Weeks

TRACtion only recognizes detections on songs that have been “fingerprinted.” We do our best to obtain and fingerprint all new releases; songs serviced through CDX are encoded automatically. Go to <https://www.cdxcd.com/fingerprinting-upload-center/> for fingerprinting.

## Chart Recurrent Methodology

When does a song move to recurrent on the chart? It is one of the more challenging issues we encountered in creating the CDX TRACtion Texas chart system. Rather than relying on subjective editorial decisions, we’ve chosen to automate this process using the weekly chart data as a marker.

We strive to avoid having singles past their prime create a logjam on the chart, because that stifles upward momentum for up-and-coming singles. But we also try to ensure that singles “on the bubble” are not removed prematurely. As long-time chart watchers know, singles often take a while to establish a solid base among early believers at radio before they truly find their legs. Due to any number of reasons, the path to peak chart position rarely includes straight-line, week-over-week spin and/or chart position growth.

On a monitored airplay chart like CDX TRACtion Texas, the reality is that new singles bounce around a bit spin-wise and position-wise, particularly in the lower half of the chart. Even small spin increases and decreases can be magnified as fairly significant up-or-down chart position moves.

With this in mind, the CDX TRACtion Texas recurrent policy grades each chart position on a curve, using an algorithm that considers the chart position and spin history for that song. Newly serviced singles are allowed 20 weeks to chart before being removed from chart consideration. Once a status change is actively being considered by the algorithm, the cumulative amount of spin loss from the single’s previous peak spin count is the trigger. The allowable spin loss varies as a percentage, depending on the chart position.

In addition to making sure that only singles with significant downward movement become recurrent, this methodology also benefits slow-developing singles in several ways. For instance, the allowable spin loss (as a percentage) is very generous at the lower reaches of the chart to accommodate the lower spin counts. Additionally, if a single is at risk of being moved to recurrent status with two consecutive weeks of minor spin loss, it can still return to positive spin growth the following week, which will reset the clock.

# Dance Time In Texas with DJ Mike (04/07/23)

## THIS WEEK'S FEATURED ARTIST • GRANT GILBERT

Raised on a cattle ranch in Santo, Texas, [GRANT GILBERT](#) was inspired by his grandparents' Texas swing and fiddle tunes & his dad's penchant for Springsteen, Petty, and country hits of the '80s. Grant was just a kid when he started playing guitar and as a teenager looking for a way to make gas money (and good times) booked his 1st gig in a local taco shop. After High School he would attend Texas Tech in Lubbock where he dove headfirst into its vibrant live-music scene. He formed a band, started writing songs in his dorm and played all over town.. After several attempts he would land a Tuesday-night gig at the legendary [Blue Light](#) which launched the careers of Wade Bowen, William Clark Green, and Josh Abbott. As his popularity grew, he would get the chance to play one of the coveted weekend slots for the college crowds. It was on his 21st birthday that Josh Abbott happened to walk in and surprised Grant and the crowd by joining him on stage and sing Gary Allan's Watching Airplanes and Tom Petty's Free Falling with Grant. That would be the start of a friendship that would eventually lead to Grant's first Top 20 hit on Texas Radio featuring Josh Abbott [SIX PACK STATE OF MIND](#).

## TOP TEXAS RED DIRT SONGS

1. [Fast Car - Randy Rogers Band](#)
2. [Keep Up with a Cowgirl - David Adam Byrnes](#)
